In this last section of the "Alusic Accessories" catalog, all the special cable trunkings made of extruded aluminum from the AC, BH, and IM lines are collected. These trunkings, divided into two separate components, the lower housing and the interlocking cover on the upper part, are ideal for creating covered and protected wired passages, protected from dust and all the risks associated with leaving exposed cables. A particular mention should be made for the 084.114.027 trunking, which with its inclined profile is particularly suitable for more sophisticated applications integrated into structures and benches, allowing also the integration of control panels.

IT

In quest'ultima sezione del catalogo "Accessori Alusic" sono raccolte tutte le speciali canaline portacavi realizzate in alluminio estruso provenienti dalle linee AC, BH e IM. Queste canaline, scomposte in due componenti separati, la sede inferiore e il coperchio ad incastro nella parte superiore, sono l'ideale per la realizzazione di passaggi cablati coperti, protetti e assicurati dalla polvere e da tutti quei rischi portati dal lasciare cavi esposti. Particolare menzione va fatta per la canalina 084.114.027, che con il suo profilo inclinato si adatta in particolar modo ad applicazioni più ricercate e integrate in strutture e banchetti, permettendo anche l'integrazione di pulsantiere.

ES

En esta última sección del catálogo "Accesorios Alusic", se recopilan todas las canalizaciones especiales para cables hechas de aluminio extruido de las líneas AC, BH e IM. Estas canalizaciones, divididas en dos componentes separados, la carcasa inferior y la cubierta de enclavamiento en la parte superior, son ideales para crear pasajes de cable cubiertos y protegidos, protegidos del polvo y de todos los riesgos asociados con dejar cables expuestos. Se debe hacer una mención especial a la canalización 084.114.027, que con su perfil inclinado es especialmente adecuada para aplicaciones más sofisticadas integradas en estructuras y bancos, permitiendo también la integración de paneles de control.

FR

Dans cette dernière section du catalogue "Accessoires Alusic", toutes les goulottes spéciales pour câbles en aluminium extrudé des lignes AC, BH et IM sont réunies. Ces goulottes, divisées en deux composants séparés, le boîtier inférieur et le couvercle à encliqueter sur la partie supérieure, sont idéales pour créer des passages de câbles couverts et protégés, protégés de la poussière et de tous les risques liés à laisser les câbles exposés. Une mention particulière doit être faite pour la goulotte 084.114.027, qui avec son profil incliné est particulièrement adaptée pour des applications plus sophistiquées intégrées dans des structures et des bancs, permettant également l'intégration de panneaux de commande.

DE

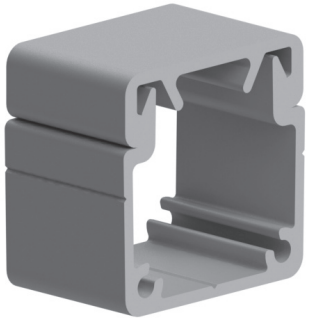

In diesem letzten Abschnitt des "Alusic-Zubehör"-Katalogs sind alle speziellen Kabelkanäle aus stranggepresstem Aluminium aus den AC-, BH- und IM-Linien gesammelt. Diese Kanäle, die in zwei separate Komponenten, das untere Gehäuse und die einrastende Abdeckung auf der oberen Seite, unterteilt sind, eignen sich ideal für die Schaffung von abgedeckten und geschützten Kabeldurchlässen, geschützt vor Staub und allen Risiken, die mit der Exposition von Kabeln verbunden sind. Eine besondere Erwähnung sollte für den Kabelkanal 084.114.027 gemacht werden, der mit seinem geneigten Profil besonders für anspruchsvollere Anwendungen in Strukturen und Bänken geeignet ist und auch die Integration von Steuerpulten ermöglicht.
